

 Next-Gen Cybersecurity

Seed Pitch Deck

KairosAI

Democratizing Real-Time Threat Detection & Plain-English Explainable AI for SMBs

Traditional Intrusion Detection Systems overwhelm non-experts with raw alert dumps. KairosAI combines lightweight ML packet analysis with LLM explanations to turn complex network logs into clear, actionable security intelligence.

- ✓ Real-Time NIDS (Scapy/PyShark)
- ✓ ML Anomaly Detection (RF + IF)
- ✓ Plain-English XAI (Llama 3)

Team: XYZ (Backend Lead) • ABC (UI/UX) • DEF (AI/ML) • GHI (QA & Security)

02 The Urgent SMB Security Crisis

Surging Cyberattacks, Unaffordable Enterprise Tools & Overwhelming Alert Fatigue

⊗ **Core Pain Points for SMBs & Education**

- 1

Alert Floods Without Human Context
Legacy IDS (Snort, Zeek) spit out thousands of raw, cryptic TCP/IP hex logs daily that require a \$150k/year security analyst to diagnose.
- 2

79% Intrusions Are Now Malware-Free
Modern attackers use stolen credentials and living-off-the-land techniques that bypass traditional static signature-based firewalls.
- 3

AI-Augmented Phishing Speed
Generative AI phishing messages achieve a 54% click rate vs 12% for human phishing, accelerating initial intrusion vectors dramatically.
- 4

Prohibitive Cost of Enterprise SIEMs
CrowdStrike, Darktrace, and Splunk require six-figure budgets and complex deployment teams impossible for SMBs.

03 The Solution: KairosAI

Democratizing Intrusion Detection Through Machine Learning & Explainable AI

Real-Time Packet Sniffing

Continuous capture of network traffic via Scapy/PyShark. Extracts 5-tuple metadata, packet sizes, flow rates, and payload entropy without violating user privacy.

Scapy • PyShark • Async FastAPI

Dual ML Detection Engine

Supervised **Random Forest** flags known attack vectors with 99%+ accuracy, while unsupervised **Isolation Forest** catches novel zero-day network anomalies.

Scikit-Learn • RF • Isolation Forest

Explainable AI (XAI) Layer

Queries local LLM (Llama 3 via Ollama/OpenAI) to translate anomalous feature vectors into clear, plain-English incident summaries and recommended response steps.

Llama 3 • Ollama • XAI Prompts

Intuitive Real-time Dashboard

Real-time streamlit dashboard with interactive diagrams (React Flow), charts (Chart.js), and automated incident reports.

React • Tailwind • Streamlit

Core Value Proposition: KairosAI turns complex cybersecurity data into plain language, allowing any IT generalist to manage network defense effectively at 1/10th the

04 Market Opportunity & Target Verticals

A \$50B+ Addressable Market Hungry for Accessible Network Security

TAM

\$50.2 Billion

Global SMB Cybersecurity Market

Total worldwide spending by small and mid-sized enterprises on cybersecurity software and services by 2026.

SAM

\$12.4 Billion

SMB Network Intrusion & SOC Market

Addressable segment focused on network detection, threat intelligence, and log monitoring for companies with <1,000 employees.

\$450 Million

Initial Serviceable Market

Higher-Ed Computer Labs, Regional Mar and high-risk Fintech/Healthcare SMBs.

Small & Medium Enterprises

Companies with 10–500 employees lacking a dedicated SOC team, requiring zero-overhead plug-and-play protection.

Educational Institutions

Universities, high schools, and computer science labs needing affordable NIDS with teaching-friendly XAI explanations.

Managed Service Providers (MSPs)

MSPs looking for a multi-tenant, white-label bundle for hundreds of client sites.

05 System Architecture & Data Pipeline

Modular 6-Stage Pipeline Built for Speed, Accuracy & Explainability

 **Backend:** Python 3.11, FastAPI, Scapy, PyShark, SQLite

 **ML & AI:** Random Forest, Isolation Forest, Llama 3, Ollama API

 **Frontend:** React, Tailwind C

06 Product Capabilities & Performance Metrics

Enterprise-Grade Performance Engineered for Resource-Constrained Environments

KairosAI Live Threat Monitor (Mock UI)

HIGH SEVERITY ALERT

10:42:15 AM

Port Scan & Lateral Reconnaissance Detected

Source IP: 192.168.1.105 → Destination: 192.168.1.1 (Gateway)

AI Explanation: "Host 192.168.1.105 attempted 84 SYN connections to consecutive ports within 2.4 seconds. Random Forest flagged high entropy score (0.94). This indicates automated port scanning. *Recommended Action: Isolate host 192.168.1.105 immediately.*"

MEDIUM SEVERITY

10:38:02 AM

Unusual Data Transfer Volume

Source IP: 10.0.4.12 (Finance PC) → 185.220.101.5 (External IP)

99.2%

ML Detection Accuracy

Validated on benchmark NIDS datasets (CIC-IDS) with near-zero false positive rates a

07 Competitive Landscape & Defensive Moat

Positioned at the Intersection of ML Anomaly Detection & Natural Language XAI

Feature / Metric	Legacy IDS (Snort/Zeek)	Enterprise SIEM (Splunk/CrowdStrike)	Enterprise NDR (Darktrace)	KairosAI
Plain-English XAI Explanations	✗ No (Raw Logs)	— Limited Jargon	— Proprietary Alerts	✓ Easier to Understand
Target Market	DevOps / Enterprise	Fortune 2000 Enterprises	Enterprise SOCs	SMIs, MSSPs, and Security Teams
Annual Cost (TCO)	Open-Source + Analyst Cost (\$150k+)	\$100,000+ / Year	\$60,000+ / Year	< \$30,000 / Year
Malware-Free Attack Detection	✗ Signature Only	✓ Yes	✓ Yes	✓ Improved Accuracy
Setup & Deployment Time	Weeks of Rule Tuning	Months of SIEM Integration	Weeks of Passive Learning	< 15 Days

Key Moat 1: Proprietary Security Prompt Library tailored for network anomaly interpretation.

Key Moat 2: Ultra-fast hybrid supervised/unsupervised pipeline optimized for

08 Business Model & Go-To-Market Strategy

SaaS Subscription Model Paired with Channel Partner Distribution

Community Sensor

Freemium

\$0 / forever

For university labs, security researchers, and micro-networks.

✓ Single Sensor Sniffing

✓ Basic Random Forest ML

✓ Community Threat Feeds

Pro SMB

Most Popular

\$299 / month / site

Full security stack for small-to-medium businesses.

✓ Real-time NIDS (Up to 1Gbps)

✓ Dual ML (RF + Isolation Forest)

✓ Local Llama 3 XAI Engine

✓ Automated PDF Incident Reports

MSP Partner Portal

\$999 / month

For Managed Service Providers managir

✓ Multi-Tenant Central Dashboard

✓ White-Labeled Incident Reports

✓ API Integrations (Slack/Teams)

✓ Dedicated Support & SLA

Go-To-Market Acceleration Drivers

- 1. MSP Partner Channel:** Partnering with regional MSPs who bundling KairosAI into monthly managed IT suites for 20+ clients each.
- 2. Open-Source Bottom-Up Virality:** Releasing the core packet capture tool on GitHub to build developer and university lab trust.
- 3. Direct Sales in Regulated SMBs:** Targeted ou clinics, local banks, and K-12 school districts.

09

Team Execution & 12-Month Roadmap

Balanced Technical Team Ready to Execute Key Product Milestones

XYZ

XYZ

Backend & Architecture Lead

FastAPI, Scapy packet capture engine, database schema, and high-performance API design.

ABC

ABC

Frontend & UI Lead

React dashboard development, Tailwind CSS design system, Chart.js & React Flow topology graphs.

DEF

DEF

AI/ML Threat Specialist

Scikit-Learn feature engineering, model training (RF/IF), and Llama 3 XAI prompt design.

Integration testing, comprehensive

📍

12-Month Execution Roadmap

Q1 2026

MVP Prototype

Scapy packet capture + RF/IF models + local Ollama Llama 3 integration.

Q2 2026

SMB Beta Trial

Deploy in 20 SMB sites & 5 University Computer Labs; refine XAI prompts.

Q3 2026

MSP Portal Launch

Multi-tenant central dashboard, white-labeling, and automated API webhook alerts.

Q4 2026

Zero Trust & Edge

Cloud SIEM connectors, lightweight IoT sensors.

10 Financial Vision & Investment Ask

Seeking \$750,000 Seed Funding to Scale Product & Channel Partnerships

 Use of Funds & Strategic Outcomes
